Revision Code: <u>A-2</u>		

OBSERVATION INFORMATION

Species	Date(s) Observed	Spawning	Rearing	Migration	Anadromous
<u>Chum</u>	<u>8/14/95</u>	<u>X</u>			

IMPORTANT: Provide all supporting documentation that this water body is important for the spawning, rearing or migration of anadromous fish, including: number of fish and life stages observed; sampling methods, sampling duration and area sampled; copies of field notes; etc. Attach a copy of a map showing location of mouth and observed upper extent of each species, as well as any other information such as: specific stream reaches observed as spawning or rearing habitat; locations, types, and heights of any barriers; etc.

Comments: I counted 2 dozen chum spawning in the tributary indicated on the map. There is a 30' falls 200 yds up the tributary. Chum were spawning just below the falls and juvenile coho were visually observed below the falls. Another 2 dozen chum were observed in the mainstem at the confluence of the tributary.

Name of Observer (please print) James P. Coriello ALASKA DEPT. OF FISH & GAME
Date: 10/26/95 Signature: James P. Coriello NOV 22 1995
Address: Box 667
Petersburg, AK 99833 REGION II HABITAT AND RESTORATION DIVISION

This certifies that in my best professional judgement and belief the above information is evidence that this waterbody should be included in or deleted from the Catalog of Waters Important for Spawning, Rearing or Migration of Anadromous Fishes per AS 16.05.870.

Signature of Area Biologist: Phil Sponney
